Compilation Data

Levelled.....1957.58  
Boundaries.....Apr 1971

1:2500 scale \* 1:1250 scale (photographically reduced)  
(a) Surveyed.  
(b) Reconstructed from former County Series plans and revised.  
(c) Fully revised.

HEIGHTS are given in METRES above the Newlyn Datum.  
Enclosures or features shown for measurement of area, also particulars of Bench Marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.  
The alignment of canals where shown is approximate.

LAN SU 1240-1340

SYMBOLS

	Non-coniferous Trees		Antiquity (site of)
	Coniferous Trees		Culvert
	Scrub		Direction of water flow
	Rough Grassland		Electricity Pylon
	Marsh		Electricity Transmission Line
	Reeds		Triangulation Station
	Change of boundary mering		Traverse Station (permanent)
	See AREAS notes		Bench Mark
			Surface Level
			Revision Point (instrumentally fixed)
			Revision Point & Bench Mark coincident

BOUNDARIES

	England & Wales County Boundary (geographical)		Scotland County Boundary (geographical)
	County & Civil Parish Boundary (ceremonial)		County Boundary (geographical)
	London Borough Boundary		County of the City Boundary
	County District Boundary based on civil parish		County of the City Boundary
	Civil Parish Boundary		Burgh Boundary
	Part & Ward Boundary based on civil parish		Burgh Boundary
	Part & Ward Boundary not based on civil parish		District Council Boundary
	Where the boundary of an Admin. Co., County Borough, or Co. of City is coincident with that of a geographical county, the symbol for the latter is shown.		Not with parish
	Base of Bank		Coincident with parish
	Centre of Bank		Examples of Boundary Merings
	Centre of Stream, etc.		Face of Fence
	Centre of Drains, etc.		Dis. Bdy.
	Edge of Kerb		Face of Wall
			Face of Road, etc.
			Face of Hedge
			Face of River, etc.
			Face of Trough
			Face of Und.
			Face of Und.

AREAS

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 8400..... parcel number  
1-029ha..... area in hectares  
4-47..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features shown for measurement of area, also particulars of Bench Marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. Limits of area within which individual parcels are not shown. To convert hectares to acres multiply by 2.4745. To convert acres to hectares multiply by 0.4047.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: N 1380415

EASTING	NORTHING
138	415
1380	4150
13800	41500
138000	415000
1380000	4150000

TEN METRE REFERENCE SU 1380415

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'

Made and published by the Director General of the Ordnance Survey, Southampton.

One grid square on this plan represents one hectare.

AREA measurement is to plan edge only.

EXAMPLE: 8400..... parcel number  
1-029ha..... area in hectares  
4-47..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features shown for measurement of area, also particulars of Bench Marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. Limits of area within which individual parcels are not shown. To convert hectares to acres multiply by 2.4745. To convert acres to hectares multiply by 0.4047.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: N 1380415
