NATIONAL GRID PLANS Scale 1:1250

ORDNANCE SURVEY

HEIGHTS IN METRES

PLAN SU 133

© Crown copyright 1976

COMPILATION DATA

(a) May 1975 Levelled 1958
 (b) May 1975 Boundaries Jun 1975

(a) Surveyed, (b) Revised.
 Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General, Ordnance Survey Office, General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
 Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey Office.
 The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
 The alignment of tunnels where shown is approximate.
 Details of symbols and abbreviations used can be obtained from Ordnance Survey, Southampton.

BOUNDARIES

ENGLAND & WALES	SCOTLAND
County	Region or Islands Area
District	District
London Borough	Not shown
Civil Parish (England)	Electoral Division
Community (Wales)	Ward
Electoral Division	Constituency (Co or Burgh)
Ward	
Constituency (Co or Boro)	

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

BOUNDARY MERINGS

B.B. Base of Bank	C.R. Centre of Road, etc.	FF. Face of Fence	T.B. Top of Bank
C.S. Centre of Stream, etc.	Del. Defaced	FW. Face of Wall	Tk.H. Track of Hedge
C.C.S. Centre of Covered Stream	E.K. Edge of Kerb	R.H. Root of Hedge	Tk.S. Track of Stream
C.D. Centre of Drain, etc.		S.R. Side of River, etc.	Und. Undefined

Imperial equivalents for metric boundary merings
 0.91m = 3ft 1.22m = 4ft

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point so within 10 metres proceed as follows:-

EXAMPLE from sheet TQ 0529 5E

1. Take the two letters preceding the sheet number TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058
3. Estimate tens of metres from the grid line to the point (distance e) 8
4. The resulting four figure number is the Easting 0588
5. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
6. Estimate tens of metres from the grid line to the point (distance n) 6
7. The resulting four figure number is the Northing 2916
8. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 05882916.

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

One grid square on this plan represents one hectare on the ground.
 To convert hectares to acres multiply by 2.471 05
