COMPILED DATA

Levelled 1958
 Boundaries Jan 1975

(a) Surveyed.
 (b) Reconstituted from former County Series plans and revised.
 (c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
 New boundary symbols adopted for England and Wales 1974 are shown on a Reference Card available from Agents.
 HEIGHTS are given in METRES above the Newlyn Datum.
 Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
 The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
 The alignment of tunnels where shown is approximate.

F.A.P.	Fire Alarm Pillar	M.H.W.S.	Mean High Water Springs	R.H.	Road House	W.B.	Weighbridge
F.B.	Filter Bed or Foot Bridge	M.L.W.	Mean Low Water	Rp.	Revision Point	Wd.Pp.	Wind Pump
F.B.M.	Fundamental Bench Mark	M.L.W.S.	Mean Low Water Springs	S.	Stone	Wks.	Works
F.S.	Flagstaff	M.P.	Mile or Mooring Post	S.B.	Signal Box	Wr.Pt.	Water Point
F.Sta.	Fire Station	M.P.U.	Mail Pickup	S.Br.	Signal Bridge	Wr.T.	Water Tap

Made and published by the Director General of the Ordnance Survey, Southampton.

Area measurement is to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
 1-809ha area in hectares
 4-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area. Limit of area within which individual parcels are not shown. To convert, hectares to acres multiply by 2.471 05. To convert, acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

- Take the two letters preceding the sheet number TQ
- Take the west edge of the grid square in which the point lies and read the figures opposite this line (to the north or south margin) 058. Estimate tens of metres from the grid line to the point (distance N) 8. The resulting four figure number is the Easting 0588.
- Take the south edge of the grid square in which the point lies and read the figures opposite this line (to the east or west margin) 291. Estimate tens of metres from the grid line to the point (distance E) 6. The resulting four figure number is the Northing 2916.
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 05882916. For further information see "An Introduction to the Projection for Ordnance Survey Maps and the National Reference System."

Imperial equivalents for metric boundary measurements: 0.91m = 3ft, 1.22m = 4ft
