Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled 1958.59
 Boundaries Mar 1980
 (a) Jul 1952
 (b) Feb 1980

(a) Surveyed, (b) Revised. Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
 Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. The representation on this plan of a road, track or path is no evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.
 Details of symbols and abbreviations used can be obtained from Ordnance Survey, Southampton.

BOUNDARIES

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & ED Bdy.
 For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

Boundary meringes

| | | | | | | | |
|-----|--------------------------|-----|------------------------|----|---------------------|------|-----------------|
| BB | Base of Bank | CR | Centre of Road, etc. | FF | Face of Fence | TB | Top of Bank |
| CB | Centre of Bank | CS | Centre of Stream, etc. | FW | Face of Wall | TK H | Track of Hedge |
| CCS | Centre of Covered Stream | Def | Delaced | RH | Root of Hedge | TK S | Track of Stream |
| CD | Centre of Drain, etc. | EK | Edge of Kerb | SR | Side of River, etc. | Und | Undefined |

Imperial equivalents for metric boundary meringes
 0.914m = 3ft 1.22m = 4ft

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—
 EXAMPLE from sheet TQ 0529 SE
 1. Take the two letters preceding the sheet number TQ 058
 2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058
 Estimate tens of metres from the grid line to the point (distance e) 8
 The resulting four-figure number is the Easting 0588
 3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
 Estimate tens of metres from the grid line to the point (distance n) 6
 The resulting four-figure number is the Northing 2916
 4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 05882916
 For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'

One grid square on this plan represents one hectare on the ground.
 To convert hectares to acres multiply by 2.471 05
