Scotland	Geographical County	County Council	County of the City	Burgh	Distric Council	City Council	Parish Consistory & Ward	Parish Consistory & Ward

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number. EXAMPLE from sheet TQ 0929 TQ 098
- Take the next edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. EXAMPLE from sheet TQ 0929 098
- Estimate the number of metres from the grid line to the point (distance in the remaining four figure number in the Easting). EXAMPLE from sheet TQ 0929 098 098
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. EXAMPLE from sheet TQ 0929 098 098
- Estimate the number of metres from the grid line to the point (distance in the remaining four figure number in the Northing). EXAMPLE from sheet TQ 0929 098 098
- The full ten metre reference is given by joining first the letters followed by the figures and then by the Northing. EXAMPLE from sheet TQ 0929 098 098

For further information see the introduction to the Progression for Ordnance Survey Plans and the National Reference System.
