Enclosures or features joined for measurement of area.
Limit of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2·47105
To convert acres to hectares multiply by 0·4047

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE K in Knighton Farm

EASTING	NORTHING
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the north or fourth margin.	Take south edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin.
