COMPILATION DATA

(b) Oct 1973

Levelled 1958,59

Boundaries Apr 1974

† 1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstituted from former County Series plans and revised.
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

right 1975

BOUNDARIES

England & Wales

County
District
London Borough
Civil Parish
Community (Wales)
Electoral Division
Parly Constituency

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Boro Const & E D Bdy
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins
New boundary symbols adopted for England and Wales 1974

Scotland

Geographical County
County Council
County of the City
Burgh
District Council
Civil Parish
Parly Constituency & Ward

Boundary mereings

S R Side of River, etc
T B Top of Bank
Tk H Track of Hedge
Tk S Track of Stream
Und Undefined

Imperial equivalents for metric boundary mereings
0·91m = 3ft 5·49m = 18ft

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

4267 ..... parcel number
EXAMPLE: 1·809ha ..... area in hectares
4·47 ..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area X
Limit of area within which individual parcels are not shown ..... Y
To convert hectares to acres multiply by 2·471 08
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE from sheet TQ 0529

1 Take the two letters preceding the sheet number TQ
2 Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance e). The resulting four figure number is the Easting. 0588
3 Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance n). The resulting four figure number is the Northing. 2916
4 The full ten metre reference is given by writing first the letters, followed by the Eastings and then by the Northing. TQ 0588 2916

058 292 058 291 059
