

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA

Levelled 1958
 Boundaries May 1974

(b) Oct 1973

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed
 (b) Reconstructed from former County Series plans and revised
 (c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Mean Sea Level.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

SYMBOLS

Non-coniferous trees	Slopes	Size of antiquity
Coniferous trees	Cliff	Culvert
Surveyed trees	Cave entrance	Direction of water flow
Orchard trees	Rock	Electricity pylon
Coppice, scrub	Boulders	Electricity Transmission Line
Scrub	Roofing material	Trangulation station
Straw	Roofed building	Traverse station (permanent)
Heath	Gravel	Bench mark
Rough grassland	Archway	Boundary jetty
Marsh, saltmarsh	Well	Revision points
Woods	Wind Pump	Revision points & bench mark coincident

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number. EX: TQ 058
- Take the west edge of the grid square in which the point lies and read the figure opposite the line on the north or south margin. EX: 058
- Take the east edge of the grid square in which the point lies and read the figure opposite the line on the east or west margin. EX: 291
- Take the south edge of the grid square in which the point lies and read the figure opposite the line on the east or west margin. EX: 291

The resulting four figure number is the Northing.

The full six figure reference is given by writing first the letters followed by the Easting and then by the Northing.

EXAMPLE from sheet TQ 058

291 058

291 058

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05.

To convert acres to hectares multiply by 0.404 69.
