NATIONAL GRID REFERENCE

The grid lines form part of the national grid and are in 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE: H in Hale Farm

EASTING	Take west edge of 100-metre square—	NORTHING	Take south edge of 100-metre square—
which point lies and read the figure opposite this line on the north or west margin.		which point lies and read the figure opposite this line on the north or west margin.
