- VEGETATION CLASSIFICATION**. Where space permits, tree and scrub symbols in woods are shown in groups of four: three, two or single to indicate dense, medium, open or scattered belts of trees or scrubs.

- AREAS**
- Area measurement is to plain edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.
- EXAMPLE: 4.267 ha 10.562 acres
- When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features within individual parcels are not shown. Limit of area within which individual parcels are not shown.
- To convert hectares to acres multiply by 2.471 05. To convert acres to hectares multiply by 0.404 69.

- NATIONAL GRID REFERENCE**
- The grid lines form part of the national grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows—
- EXAMPLE: 4 47 8 348
- EASTING**: Take west edge of 100-metre square in which point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from grid line to the point.
- NORTHING**: Take south edge of 100-metre square in which point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from grid line to the point.
