

SALISBURY CO CONST SU 2033-2132 CONVERSION SCALES HECTARES-ACRES

PITTON AND FARLEY C/P

SALISBURY AND WILTON RD

COMPILATION DATA
Levelled 1957.58
Boundaries Feb 1973

Table with 4 columns: (a) Surveyed, (b) Reconstructed from former County Surveys plans and revised, (c) Revised, and (d) Revisited. Lists various symbols and their corresponding features like Beer House, Bench Mark, Boundary Post, etc.

ABBREVIATIONS table listing symbols for features like Lighthouse Station, Level Crossing, Loading Gauge, etc.

SYMBOLS table listing symbols for features like Non-ferrous trees, Coniferous trees, Surveilled trees, etc.

BOUNDARIES table listing symbols for England & Wales, Scotland, and County boundaries.

BOUNDARY MEASUREMENTS table listing symbols for various types of boundary measurements like Base of Bank, Centre of Bank, etc.

VEGETATION CLASSIFICATION table listing symbols for various types of vegetation like Space perennials, tree and scrub symbols, etc.

Area measurements to plan edge only. The number and area in hectares (ha) and acres, is shown within each parcel of land. EXAMPLE: 4267 parcel number, 809ha area in hectares, 4.47 area in acres. When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area. Limit of area within which individual parcels are not shown. To convert hectares to acres multiply by 2.471 05. The resulting four figure number is the Easting. NATIONAL GRID REFERENCE. The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows: 1. Take the two letters preceding the sheet number. EXAMPLE from sheet TQ 0529 TQ 058. 2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance e). 058. The resulting four figure number is the Easting. 3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance n). 291. The resulting four figure number is the Northing. 4. The full six figure reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 058291.
