

SALISBURY CO CONST
SU 2035-2135
CONVERSION SCALES
HECTARES/ACRES

COMPILED DATA
Levelled 1958
Boundaries Feb 1973

1:2500 scale
(b) Oct 1972
1:1250 scale (photographically reduced)
(a) Surveyed
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on the plan of a road, track or path no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

ABBREVIATIONS table listing symbols for various features like Beer House, Bench Mark, Boundary Post, etc.

SYMBOLS table listing symbols for vegetation, slopes, culverts, and other terrain features.

BOUNDARIES table listing symbols for England & Wales, Scotland, and County boundaries.

MADE AND PUBLISHED BY THE DIRECTOR GENERAL OF THE ORDNANCE SURVEY, SOUTHAMPTON
AREAS
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4267 parcel number
1:2500 scale area in hectares
4.47 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.
Limits of area within which individual parcels are not shown.
To convert acres to hectares multiply by 0.471 05
To convert hectares to acres multiply by 2.471 05
NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
1. Take the two letters preceding the sheet number. TQ 058
2. Take the east edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 291
3. Estimate tenths of metres from the grid line to the point (distance) and read the figures opposite this line on the east or west margin. 058
4. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 291
The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 058291
For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'
