**COMPILED DATA**

Levelled ..... 1958  
Boundaries ..... Sep 1971

1:2500 scale  
(b) 1:2500 scale (photographically reduced)

(a) Surveyed  
(b) Reconstructed from former County Series plans and revised  
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark lines which may contain later levelling information, also particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on a plan of a road, track or path is approximate of the existence of a right of way.  
The alignment of a tunnel where shown is approximate.

1.22m = 4ft

**VEGETATION CLASSIFICATION:** Where space permits, tree and scrub symbols in woods are shown in groups of four; three, two or single to indicate tree, medium, open or scattered density of trees or scrub.

**AREAS**

Area measurement is to plan edge only.  
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number  
1.8977ha area in hectares  
4.67 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.  
Enclosures or features joined for measurement of area  
Limit of area within which individual parcels are not shown

To convert hectares to acres multiply by 2.47105  
To convert acres to hectares multiply by 0.40469

**NATIONAL GRID REFERENCE**

The grid lines form part of the national grid and are at 100 metre intervals. To give a reference defining the position of a point or within 10 metres proceed as follows—

EXAMPLE:  
EASTING: 212  
NORTHING: 413  
Estimate tens of metres from grid line to the point  
Estimate tens of metres from grid line to the point
