AREAS

Area measurement is to plan only.

The number and area in hectares (ha) and acres is shown within each parcel of land.

EXAMPLE: 1:800ha parcel number 1:800ha area in hectares 4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

Limit of area within which individual parishes are not shown.

To convert hectares to acres multiply by 2.4705.

To convert acres to hectares multiply by 0.4047.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:

EASTING	NORTHING
233	428
233	428
233	428
233	428
