NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals. To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:—

EXAMPLE: M in Morrish Farm

Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins

Estimate tens of metres from the grid line

2706

Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins

Estimate tens of metres from the grid line

2352

TEN METRE REFERENCE: SU 27062352

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System". The representation on this plan of a road, track or path is no evidence of the existence of a right of way. 1 square inch of this plan represents 960 of an acre on the ground. The alignment of canals where shown is approximate.
