

PARCEL NUMBERS AND ACREAGES. The number and acreage of each parcel of land is shown within the parcel. It is important when identifying a parcel to specify the number(s) of the plan(s) on which it falls. IN PARCELS DIVIDED BY THE SHEET EDGE, THE ACREAGES ARE SHOWN TO SHEET EDGE ONLY.

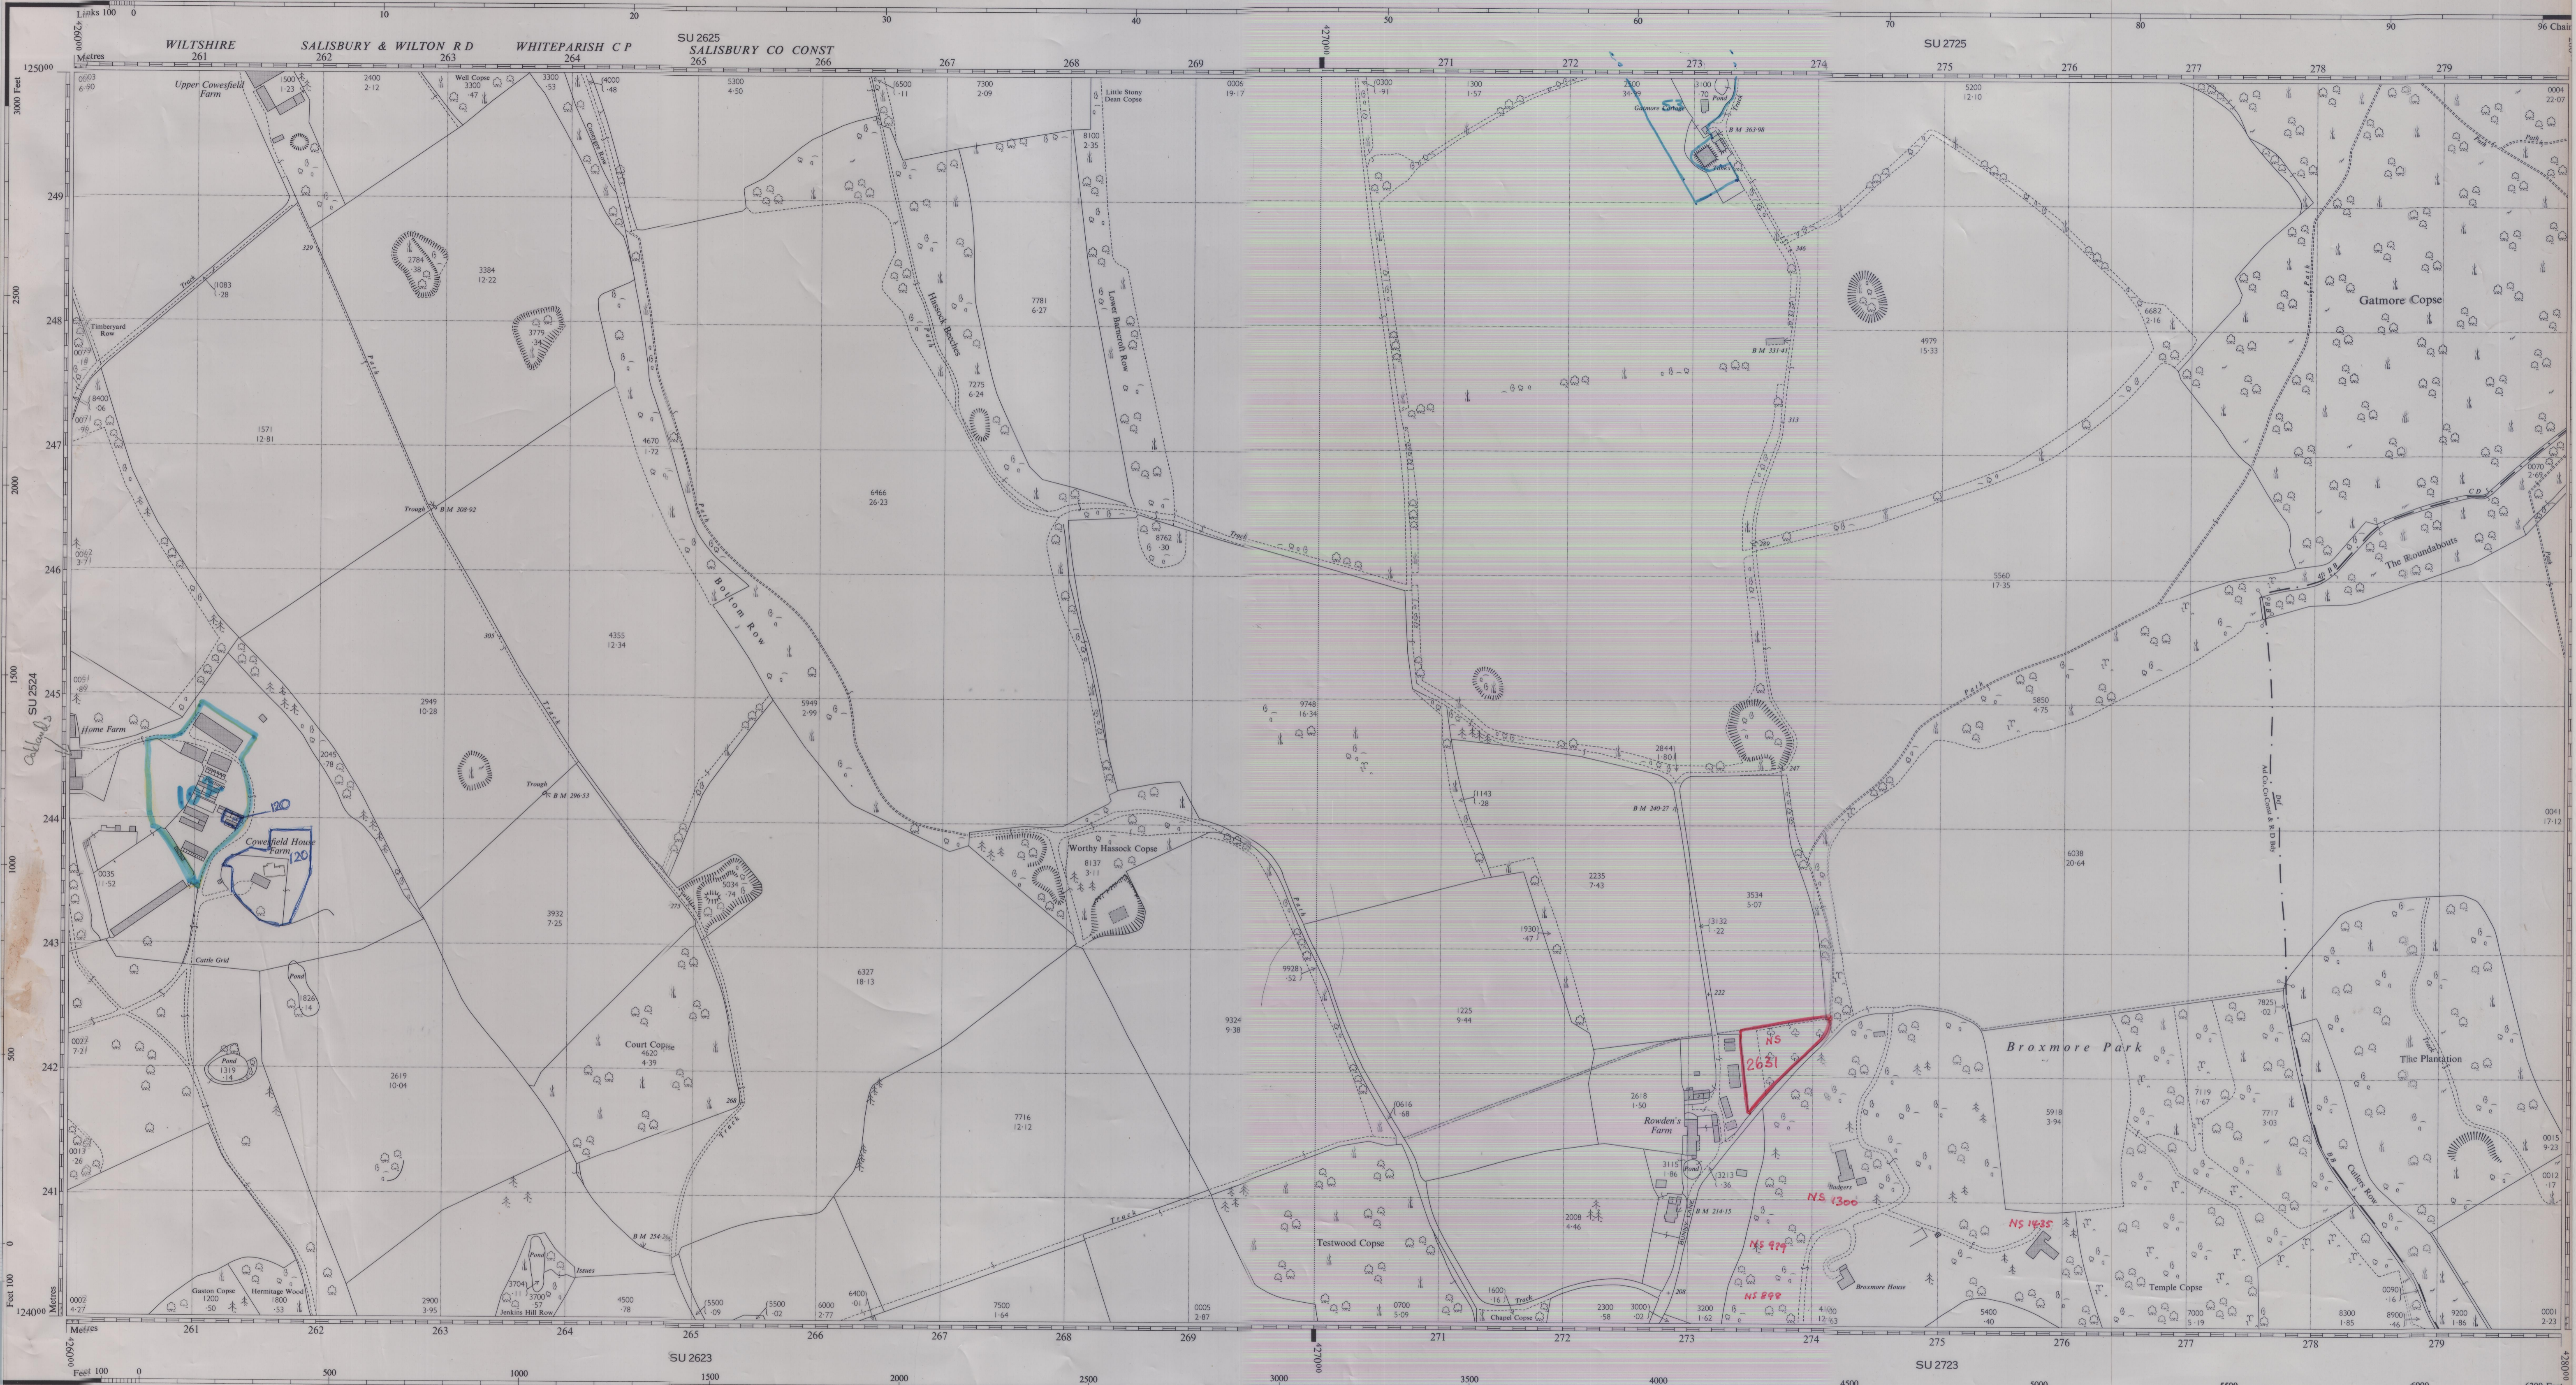

Revised May 1965 Levelled 1959

ORDNANCE SURVEY

Scale: 1:2500 or 25-344 inches to 1 mile

Revised October 1965 Levelled 1959

The West half of this sheet is Plan SU 2624 The East half of this sheet is Plan SU 2724

Made and published by the Director General of the Ordnance Survey, Chessington, Surrey, 1967. Reconstituted from former County Series plans and revised 1965.

REFERENCE

For fuller information see Reference Card published separately.

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals. To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:—

EXAMPLE: T in Testwood Copse	
EASTING	NORTHING
Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins	Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins
Estimate tens of metres from the grid line	Estimate tens of metres from the grid line
270	340
2700	2400

TEN METRE REFERENCE: SU 27002406

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System" and read the figures opposite this line on NORTH and SOUTH margins. The representation on this plan of a road, track or path is no evidence of the existence of a right of way. A square inch on this plan represents 9/64 of an acre on the ground. A square centimetre on this plan represents 1/6400 of an acre on the ground.

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of Four, Three, Two or One to indicate Close, Medium, Open or Scattered density of trees or scrub.
