CONVERSION SCALES
HECTARES-ACRES

Made and published by the Director General of the Ordnance Survey, Southampton.

Area measurement is to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
15207ha area in hectares
4-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE
The grid lines form part of the national grid and are 100 metres apart. To give a reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: H in Park Hill

EASTING	NORTHING
Take west edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin	Take south edge of 100 metre square in which point lies and read the figures opposite this line on the east or west margin
Estimate tenths of metres from grid line to the point	Estimate tenths of metres from grid line to the point
7540	3515

TEN METRE REFERENCE: ST 75403515
