

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA  
Levelled.....1974  
Boundaries.....Jun 1979  
(a) Feb 1979

Scale: 1:2500 scale (photographically reduced)  
(a) Surveyed.  
(b) Reconstructed from former County Series plans and revised.  
(c) Revised.

HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road, track or path is evidence of the existence of a right of way.  
The alignment of tunnels where shown is approximate.

HECTARES  
ACRES  
METRES-FEET  
1 metre = 3.2808 feet  
1 foot = 0.3048 metres

Revision point and bench mark coincident

BOUNDARIES  
ENGLAND & WALES  
County  
District  
London Borough  
Civil Parish (England)  
Community (Wales)  
Electoral Division  
Ward  
Constituency (County, Borough or European Assembly)  
Borough Council  
County Council  
Region or Islands Area  
District  
Civil Parish (England)  
Community (Wales)  
Electoral Division  
Ward  
Constituency (County, Borough or European Assembly)  
Borough Council  
County Council  
Borough Council & E.D. Body  
Constituency (County, Borough or European Assembly)  
Constituent boundaries are shown by the appropriate symbol above, e.g. County Boundary in dotted line, District Boundary in dashed line, etc.  
For Ordnance Survey purposes County Boundary is deemed to be the limits of the parish structure whether or not a parish area exists.

AREAS  
Area measurement is to plan edge only.  
The number and area in hectares (ha) and acres, is shown within each parcel of land.  
EXAMPLE: 1-879/ha area in hectares  
12/12/ha area in acres  
When identifying a parcel it is important to specify the number of the plan on which it falls.  
Enclosures or features joined for measurement of area are shown by a dashed line.  
The limits of area within which individual parcels are not shown are shown by a dotted line.  
To convert hectares to acres multiply by 2.471 05  
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE  
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:  
EXAMPLE from sheet TQ 0529  
1. Take the two letters preceding the sheet number TQ 058  
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. 058  
3. Estimate tenths of metres from the grid line to the point (distance 4) 0588  
4. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. 291  
5. Estimate tenths of metres from the grid line to the point (distance 4) 2914  
The resulting four figure number is the Northing. 2914  
The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 05882914
