

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA

Levelled.....1974
Boundaries.....Dec 1979

† 1:2500 scale (photographically reduced)
* 1:1250 scale (photographically reduced)

(a) Surveyed
(b) Reconstituted from former County Series plans and revised.
(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark (BM) lines, which may contain level levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

	Track of Stream
	Undefined

AREAS

Area measurement is to plan edge only.

Estimate area in hectares (ha) and acres, as shown within each parcel of land.

EXAMPLE: 1 807ha parcel number 4267 area in hectares

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are shown within each parcel of land. Limits of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number. TQ 292
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. 058
- Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. 291
- Estimate the metres from the grid line to the point (distance 0.5). The resulting four figure number is the Northing. TQ 058291

The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 058291.058
