

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled.....1952
Boundaries.....Oct 1978

1:2500 scale * 1:1250 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain laser levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

SYMBOLS

	Non-coniferous trees		Site of antiquity
	Coniferous trees		Culvert
	Surveyed trees		Direction of water flow
	Orchard trees		Pylon
	Coppice, alder		E.D. Bdy.
	Scrub		Bare Canal Bdy.
	Heath		Canal Bdy.
	Bracken rough ground		Burgh Canal Bdy.
	Sloping masonry		CO Canal Bdy.
	Roofed building		
	Glasshouse		
	Arched bridge		
	Surface level		
	Revision point		
	Revision point & bench mark coincident		

BOUNDARIES

England & Wales

	County
	District
	London Borough
	Civil Parish (England)
	Community (Wales)
	Electoral Division
	Ward
	Constituency (Co or Boro.)

Scotland

	Region or Islands Area
	District
	Not shown

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area. Limits of area within which individual parcels are not shown.

EXAMPLE: 1:307ha area in hectares
The resulting four figure number is the Easting.

To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

- Take the two letters preceding the sheet number. [EXAMPLE from sheet TG 059]
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. [EXAMPLE 058]
- Estimate tenths of metres from the grid line to the point (distance). [EXAMPLE 0588]
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. [EXAMPLE 291]
- Estimate tenths of metres from the grid line to the point (distance). [EXAMPLE 2916]
- The resulting four figure number is the Northing.
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. [EXAMPLE TG 0582916]

For further information see 'An Introduction to the Projection for Ordnance Survey Plans and the National Reference System.'
