

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled.....1952
Boundaries.....Oct 1978
1:2500 scale
1:11250 scale (photographically reduced)
Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

1 hectare = 2.471 acres
1 metre = 3.2808 feet
1 foot = 0.3048 metre

ABBREVIATIONS and SYMBOLS table listing various features and their corresponding symbols. Includes categories for Beer House, Bench, Boundary, etc., and symbols for fences, roads, and other landmarks.

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is in plan area only.
Enclosures or features joined for measurements of area.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4267 parcel number
4.47 area in hectares
10.94 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Limit of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—
EXAMPLE from sheet TQ 0529
1. Take the two letters preceding the sheet number. TQ 058
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the east or south margin. 058
3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. 291
4. The resulting four figure number is the Easting.
5. The resulting four figure number is the Northing.
6. Estimate tenths of metres from the grid line to the point (distance) 4.47
7. The resulting four figure number is the Northing.
8. The final six figure reference is given by writing first the letters, followed by the Easting and then by the Northing.
For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'
