

COMPILATION DATA

Levelled.....1952
Boundaries...Oct 1978

1:12500 scale
(b) Feb 1978

1:12500 scale (photographically reduced)
(a) Surveyed.
(b) Reassessed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain level levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of canals where shown is approximate.

Rock
Boulders
Sloping masonry
Roofed building
Glasshouse
Archway
Change of boundary marking
see AREAS notes

Site of antiquity
Culvert
Direction of water flow
Pylon
ETL Electricity Transmission Line
Translocation station
Traverse station (permanent)
Bench mark
Surface level
Revision point
Revision point & bench mark coincident

BOUNDARIES

ENGLAND & WALES
County
District
London Borough
Civil Parish (England)
Community (Wales)
Electoral Division
Ward
Constituency (Co or Boro)

SCOTLAND
Region or Islands Area
District
No. shown
Electoral Division
Ward
Constituency (Co or Boro)

Concoid boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy.
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

BOUNDARY MERGINGS

B.B. Base of Bank	C.R. Closure of Road, etc.	F.F. Face of Fence	T.B. Top of Bank
C.B. Centre of Bank	C.S. Closure of Stream, etc.	F.W. Face of Wall	T.H. Track of Hedge
C.D. Centre of Drain, etc.	E.K. Edge of Kerb	S.R. Side of River, etc.	Und. Undefined

Vertical equivalents for metric boundary markings
0.91m = 3ft
1.52m = 5ft

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS

Area measurement is to plan only.
Estimate area in hectares (ha) and acres, as shown within each parcel of land.
EXAMPLE: 4.267 parcel number
4.47 area in hectares
10.92 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features pinned for measurement of area
Limit of area within which individual parcels are not shown
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number TQ
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 29
- Estimate tens of metres from the grid line to the point (distance a) 8
- Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 291
- Estimate tens of metres from the grid line to the point (distance b) 4
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 291
- Estimate tens of metres from the grid line to the point (distance c) 8
- The full ten metre reference is given by writing first the letter 'a' followed by the Easting and then by the Northing. TQ 0529 291 4 291 8
