

Make and published by the Director General of the Ordnance Survey, Southampton.

Scale: 1:2500

Levelled: 1952

Boundaries: Oct 1978

Compilation Date: (b) Mar 1978

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lines, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

ENGLAND & WALES

County

District

London Borough

Civil Parish (England)

Community (Wales)

Electoral Division

Ward

Constituency (Co or Boro)

BOUNDARIES

E D Bdy

Ward Bdy

Boro Const Bdy

Co Const Bdy

SCOTLAND

Region or Islands Area

District

Not shown

Electoral Division

Ward

Constituency (Co or Bargo)

CONTOUR BOUNDARIES are shown by the first appropriate symbol above, e.g. Boro Const & E D Bdy

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

Boundary meriting

Face of Fence

Face of Wall

Roof of Hedge

Edge of Bank

Side of River, etc.

Top of Bank

Track of Stream

Undeified

Imperial equivalents for metric boundary meriting

0.91m = 3ft

1.52m = 5ft

AREAS

Area measurement is to plan edge only.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 1 809ha 210a 52c area in hectares

40867 parcel number

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area

Limit of area within which individual parcels are not shown

To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ 0529

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate area of metres from the grid line to the point (distance x) = 058

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate area of metres from the grid line to the point (distance y) = 291

The resulting four figure number of the Northing is 2916

4. The full six figure reference is given by writing first the letters, followed by the Easting and then the Northing TQ 0582916

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'
