COMPILED DATA: Levelled 1952, Boundaries Oct 1979

AREAS: Area measurement is to plan only. The number and areas in hectares (ha) and acres, is shown within each parcel of land. Example: 4.267 parcel number, 1.879ha area in hectares, 4.67 acres in acres.

NATIONAL GRID REFERENCE: The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows: Example from sheet TQ 0529: 1. Take the two letters preceding the sheet number: TQ 291; 2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin: 058; 3. Estimate (in metres) from the grid line to the point (distance x): 8; 4. The resulting four figure number is the Easting: 0588; 5. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin: 291; 6. Estimate (in metres) from the grid line to the point (distance y): 4; 7. The resulting four figure number is the Northing: 2914; 8. The full six figure reference is given by writing first the Easting followed by the Easting and then the Northing: TQ 05882914; 9.
