HERG

ORDNANCE SURVEY

Scale: 1:2500 or 25·344 inches to 1 mile

PLAN ST 8822 & PLAN ST 8922

PARCEL NUMBERS AND ACREAGES
The number and acreage of each parcel of land is shown within the parcel. It is important when identifying a parcel to specify the number(s) of the plan(s) on which it falls.

IN PARCELS DIVIDED BY THE SHEET EDGE, THE ACREAGES ARE SHOWN TO SHEET EDGE ONLY.

Revised August 1964
Levelled 1957

Revised August 1964
Levelled 1952,57

REFERENCE

For fuller information see Reference Card published separately.

NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.
To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:

EXAMPLE: *K in Knight's Farm*

EASTING	NORTHING
Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins	*Take south edge of square in which point lies and read the figure opposite this line on EAST and WEST margins*
891	224
5	4
Estimate tens of metres from the grid line	2244
8915	

TEN METRE REFERENCE: ST 89152244.

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System."
The representation on this plan of a road, track or footpath is no evidence of the existence of a right of way.
1 square inch on this plan represents ·391 of an acre on the ground.
The shortest distance between any two points on the boundary of a parcel may be greater than the length of a straight line joining those points.

Antiquities ..... (site of)
Change of boundary Mercing .....
Limit of area within which the acreages of individual parcels are not shown .....

Parcels joined for acreages .....
