REFERENCE

For fuller information see Reference Card published separately.  
NATIONAL GRID REFERENCE  
The lines on the plan form part of the National Grid and are spaced at 100 metre intervals.  
To give a large scale reference define the position of a point to the nearest 10 metres proceed as follows—  
EXAMPLE M in Morgan's Hanging  
EASTING: Take west edge of square in which point lies and read the figures opposite this line on NORTH and SOUTH margins. Estimate tens of metres from the grid line. 091 231  
NORTHING: Take south edge of square in which point lies and read the figures opposite this line on EAST and WEST margins. Estimate tens of metres from the grid line. 091 231  
TEN METRE REFERENCE: ST 89152316  
For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System".  
The representation on this plan of a road, track or footpath is an evidence of the existence of a right of way.
