(c) Revised

Survivors of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Mean Sea Level.

Bench mark lines, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of roads, tracks or paths is not evidence of the existence of a right of way. The alignment of roads where shown is approximate.

CONVERSION SCALES

HECTARES-ACRES

1 hectare = 2.471 acres

1 acre = 0.4047 hectares

METRES-FEET

1 metre = 3.2808 feet

1 foot = 0.3048 metres

AREAS

Area measurement is to plan only.

The number and area in hectares (ha) and acres is shown within each parcel of land.

EXAMPLE: 4.267 parcel number
1.807ha area in hectares
4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are shown within each parcel of land. Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE: from sheet TQ 055

- Take the two letters preceding the sheet number. TQ 058
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. 058
Estimate tens of metres from the grid line to the point (distance in metres). 058
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. 291
Estimate tens of metres from the grid line to the point (distance in metres). 291
- The resulting four figure number is the Northing. 058 291
The resulting four figure number is the Easting. 058 291
The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 058291ha
