

MADE AND PUBLISHED BY THE DIRECTOR GENERAL OF THE ORDNANCE SURVEY, SOUTHAMPTON.

One grid square on this plan represents one hectare.

AREAS
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 1-070ha parcel number
1-070ha area in hectares
4-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area 058
Limit of area within which individual parcels are not shown 7
To convert hectares to acres multiply by 2.471 056
To convert acres to hectares multiply by 0.404 686

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—
EXAMPLE from sheet TQ 0529
1. Take the two letters preceding the sheet number TQ 0529
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 058
3. Estimate tens of metres from the grid line to the point (distance x) 4
4. Estimate units of metres from the grid line to the point (distance y) 6
The resulting four figure number is the Northing 0584
5. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 291
6. Estimate tens of metres from the grid line to the point (distance x) 4
7. Estimate units of metres from the grid line to the point (distance y) 6
The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 05842914
For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.

COMPILATION DATA
Levelled 1952
Boundaries Mar 1979
(a) Oct 1978

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark data, which may contain least levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.
