COMPILATION DATA

Levelled.....1952
Boundaries.....Jun 1979

(a) Surveyed.
(b) Reconstituted from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark data, which may contain laser levelling information and particulars of bench marks to which no values have been shown, are obtained from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number..... TQ 0529
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 292
- Estimate tenths of metres from the grid line to the point (distance east or west margin)..... 0588
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 291
- Estimate tenths of metres from the grid line to the point (distance north or south margin)..... 0588
- The resulting four figure number is the Northing..... 291 0588
- The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... TQ 0588291
