AREAS
 Area measurement is to plan edge only.
 The number and area, in hectares (ha) and acres, is shown within each parcel of land.
 EXAMPLE: 1:870ha parcel number 4:47 area in acres

NATIONAL GRID REFERENCE
 The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
 EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ
 2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 058
 3. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 291
 4. The full ten metre reference is given by writing first the letters, followed by the Easting and then the Northing TQ 058291
