COMPILED DATA

Levelled ..... 1952.57

Boundaries ..... Sep 1978

(b) Feb 1978

1:2500 scale \* 1:2500 scale (photographically reduced)

(a) Surveyed

(b) Reconstituted from former County Series plans and revised

(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

Bench marks (BM) which may contain later levelling information and particulars of bench marks to which no 10 feet have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is evidence of the existence of a right of way. The alignment of a canal where shown is approximate.

Imperial equivalents for metric boundary mering

0 Metre = 3 1/4 Feet

1 Metre = 39 3/8 Inches

AREAS

Area measurement is to plan edge only.

Enclosures or features joined for measurement of area.

The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 1257 parcel number

15077ha area in hectares

4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area.

Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ 0529
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance in metres) 291
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance in metres) 291
4. The full ten metre reference is given by writing first the letters followed by the Easting and then by the Northing. TQ 052916
