CONVERSION SCALES

SYMBOLS

BOUNDARIES

Made and published by the Director General of the Ordnance Survey, Southampton

AREAS
Area measurements in sq. plan only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 1-23/45 parcel number
1-67/89 area in hectares
1-34/56 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurements of area.
Limits of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2.471 05.
To convert acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference (defining the position of a point to within 10 metres) proceed as follows:
1. Take the two letters preceding the sheet number.
2. Take the two digits on the east edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin.
3. Take the two digits on the west edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin.
