

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled.....1952
Boundaries.....Mar 1979

1:2500 scale * 1:1250 scale (photographically reduced)
(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation of this plan of a road, track or path is evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation of this plan of a road, track or path is evidence of the existence of a right of way. The alignment of tunnels where shown is approximate.

AREAS
Area measurements in this plan are to the nearest 0.01 hectare (0.025 acres).
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4267 parcel number
18079ha area in hectares
4.47 area in acres
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

When identifying a parcel it is important to specify the number of the plan on which it falls, enclosures or features joined for measurement of area.
EXAMPLE: 4267 parcel number
18079ha area in hectares
4.47 area in acres
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:
EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number TQ 0529
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin. Estimate tenths of metres from the grid line to the point (distance x) 058
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin. Estimate tenths of metres from the grid line to the point (distance y) 291
- The full ten metre reference is given by writing first the letters, followed by the Easting and then the Northing TQ 0582916

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'
