

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA

Levelled.....1952
Boundaries...May 1979

(b) Dec 1978

1:2500 scale 1:12500 scale (photographically reduced)

(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Supplies of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark less, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of roads where shown is approximate.

SYMBOLS

	Non-coniferous trees		Stops
	Coniferous trees		Cliff
	Orchard trees		Cave entrance
	Coppice/oster		Rock
	Scrub		Boilers
	Heath		Sloping masonry
	Bracken, rough grassland		Roofed building
	Marsh		Glasshouse
	Reeds		Archway
			Change of boundary marking
			Revision point
			Revision point & bench mark coincident

BOUNDARIES

	ENGLAND & WALES		SCOTLAND
	County		Region or Island Area
	District		London Borough
	Civil Parish (England)		Civil Parish (Wales)
	Electoral Division		Electoral Division
	Ward		Ward
	Constituency (County, Borough or European Assembly)		Constituency (County, Borough or European Assembly)
	Euro Const Bdy		Euro Const Bdy
	Boro Const & E.D. Bdy		Boro Const & E.D. Bdy
	Boro Const Bdy		Boro Const Bdy
	E.D. Bdy		E.D. Bdy
	Bury Const Bdy		Bury Const Bdy
	Co Const Bdy		Co Const Bdy

Concurrent boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E.D. Bdy. For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

AREAS

Area measurements in plain edge only. The number and area in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4.27 area in hectares
10.27 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area. Estimate tens of metres from the grid line to the point (distance in metres). The resulting four figure number is the Easting.

To convert metres to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number. TQ 058
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 058
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. 291
- The resulting four figure number is the Northing. 2916
- The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 058916

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
