AREAS

Area measurement in 100 metre squares only

The number and area in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4.27 ha 10.47 acres

1. Take the two letters preceding the sheet number.

2. Take the west edge of the grid square in which the point lies and find the figure opposite this line on the north or south margin.

3. Take the south edge of the grid square in which the point lies and find the figure opposite this line on the east or west margin.

4. The full ten metre reference is given by writing first the letters, followed by the figure from the north margin, then the figure from the west margin.

5. The figure from the north margin is given by writing first the letters, followed by the figure from the west margin.

6. The figure from the west margin is given by writing first the letters, followed by the figure from the north margin.

7. The figure from the north margin is given by writing first the letters, followed by the figure from the west margin.

8. The figure from the west margin is given by writing first the letters, followed by the figure from the north margin.

1:2500 scale

(a) Surveyed

(b) Reconstituted from former County Series plans and revised

(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Boundaries are shown in black on this plan. The position of the boundary is shown in black on this plan. The position of the boundary is shown in black on this plan.

The alignment of roads is shown in black on this plan. The position of the boundary is shown in black on this plan.

CONSIDER BOUNDARIES ARE SHOWN BY THE FIRST APPROPRIATE SYMBOL ABOVE, e.g. Boro Const & ED Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area aligns.

Boundary markings

B.B. Base of Bank

C.R. Centre of Road etc.

C.S. Centre of Street

C.D. Centre of Drain, etc.

E.K. Edge of Keels

F.F. Face of Fence

R.H. Ridge of Hill

S.R. Side of River, etc.

T.B. Top of Bank

T.H. Track of Hedge

U. Undefined

When identifying a parcel it is important to specify the number of the plan on which it lies. Enclosures or features joined for measurement of area. Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.47105

To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows: EXAMPLE from sheet TQ 0579

1. Take the two letters preceding the sheet number: TQ

2. Take the west edge of the grid square in which the point lies and find the figure opposite this line on the north or south margin: 058

3. Take the south edge of the grid square in which the point lies and find the figure opposite this line on the east or west margin: 296

4. The full ten metre reference is given by writing first the letters, followed by the figure from the north margin, then the figure from the west margin: TQ 058296

5. The figure from the north margin is given by writing first the letters, followed by the figure from the west margin: TQ 058296

6. The figure from the west margin is given by writing first the letters, followed by the figure from the north margin: TQ 058296

7. The figure from the north margin is given by writing first the letters, followed by the figure from the west margin: TQ 058296

8. The figure from the west margin is given by writing first the letters, followed by the figure from the north margin: TQ 058296
