

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled: 1952
Boundaries: Aug 1977

1: 2500 scale * 1:250 scale (photographically reduced)
(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain level levelling information and particulars of bench marks which no longer have been shown, are obtainable from the Director General, Ordnance Survey.

The representation of a road, track or path is not evidence of the existence of a right of way.
The alignment of a tunnel where shown is approximate.

L.P.	Level Post	P.P.	Post Office	T.S.	Track of Stream

CONVERSION SCALES

HECTARES-ACRES

1 hectare = 2.471 acres

1 acre = 0.4047 hectares

SYMBOLS

—	Slopes	—	Site of antiquity
—	Cliff	—	Culvert
—	Cave entrance	—	Direction of water flow
—	Rock	—	Triangulation station
—	Buttress	—	Electricity Transmission Line
—	Sloping masonry	—	Traverse station (see notes)
—	Roaded building	—	Surface level
—	Archway	—	Revision point
—	Change of boundary masonry	—	Revision point & bench mark consistent
—	see AREAS notes	—	

BOUNDARIES

England & Wales

—	County	—	County
—	District	—	District
—	London Borough	—	London Borough
—	Civil Parish (England)	—	Civil Parish (England)
—	Community (Wales)	—	Community (Wales)
—	Electoral Division	—	Electoral Division
—	Ward	—	Ward
—	Consistency (Co or Baro)	—	Consistency (Co or Baro)

Scotland

—	Region or Island Area	—	Region or Island Area
—	District	—	District
—	Electoral Division	—	Electoral Division
—	Ward	—	Ward
—	Consistency (Co or Burgh)	—	Consistency (Co or Burgh)

Concurrent boundaries are shown by the first appropriate symbol above, e.g. "C" County & E.D. Burgh.
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish structure exists.

AREAS

Area measurement is to plan edge only.
Enclosures or features joined for measurement of area.
Limits of area within which individual parcels are not shown.

EXAMPLE: 4267 parcel number
1-829ha area in hectares
4-47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.
Limits of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number: TQ 058
- Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin: 058
- Estimate tenths of metres from the grid line to the point (distance 4): 058
- The resulting four figure number is the Easting: 0588
- Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin: 29
- Estimate tenths of metres from the grid line to the point (distance 6): 29
- The resulting four figure number is the Northing: 2916
- The full six figure reference is given by writing first the Easting, followed by the Northing and then by the Northing: TQ 05882916

For further information see "An Introduction to the Projection for Ordnance Survey Plans and the National Reference System" TQ 0582916
