

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILED DATA

Levelled 1952
Boundaries Feb 1979

(a) Surveyed
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels, where shown is approximate.

	Boundary		Boundary

SCOTLAND

	Region or Islands Area		Region or Islands Area
	Region or Islands Area		Region or Islands Area
	Region or Islands Area		Region or Islands Area
	Region or Islands Area		Region or Islands Area
	Region or Islands Area		Region or Islands Area

BOUNDARY MEASUREMENTS

	Base of Bank		Face of Wall
	Centre of Bank		Top of Bank
	Centre of Stream		Track of Hedge
	Centre of Covered Stream		Track of Stream
	Centre of Drain		Undefined
	Edge of Kerb		Undefined
	Side of River		Undefined

CONVERSION SCALES

1 metre = 3.2808 feet
1 foot = 0.3048 metre

AREAS

Area measurements in this plan are in Hectares (ha) and Acres, as shown within each parcel of land.

The number and area, in Hectares (ha) and Acres, is shown within each parcel of land.

EXAMPLE: 4267 parcel number
4.47 area in hectares
10.98 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are not shown.

Limits of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.404686

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number. (TQ)
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. (058)
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. (291)
- The full ten metres reference is given by writing first the letters followed by the Easting and then by the Northing. (TQ 058291)

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Grid System'.
