

Made and published by the Director General of the Ordnance Survey, Southampton.

Levelled.....1952  
Boundaries..... Sep 1977

1:2500 scale \* 1:2500 scale (photographically reduced)  
(a) Surveyed.  
(b) Reconstructed from former County Series plans and revised.  
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.  
HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road track or path is not evidence of the existence of a right of way.  
The alignment of townships shown is approximate.

**BOUNDARIES**

	ENGLAND & WALES County boundary		SCOTLAND District boundary
	London Borough boundary		Civil Parish (England) boundary
	Community (Wales) boundary		Electoral Division boundary
	Ward boundary		Borough Council boundary
	Constituency (Co or Boro) boundary		Borough Const. & E.D. Bdy
	Concise/feet boundaries are shown by the first appropriate symbol above, e.g. Boro Const. & E.D. Bdy		Face of Fence
	Base of Bank		Face of Wall
	Centre of Bank		Root of Hedge
	Centre of Covered Stream		Edge of Kerb
	Dal./		Side of River, etc.
	Centre of Drain, etc.		Boundary mering
	E.K./		Face of Fence
	S.R./		Top of Bank
	S.R./		Track of Hedge
	S.R./		Track of Stream
	S.R./		Undeined

**CONVERSION SCALES**  
HECTARES-ACRES  
METRES-FEET  
1 metre = 3.2808 feet  
1 foot = 0.3048 metre

**AREAS**  
Area measurement is to plan edge only.  
The number and area, in hectares (ha) and acres, is shown within each parcel of land.  
EXAMPLE: 4287 ..... parcel number  
1.857ha ..... area in hectares  
4.57 ..... area in acres  
When identifying a parcel it is important to specify the number of the plan on which it falls.  
Enclosures or features joined for measurement of area -  
1. The enclosing four figure number or the Easting.  
2. To convert hectares to acres multiply by 2.471 05  
3. To convert acres to hectares multiply by 0.404 69

**NATIONAL GRID REFERENCE**  
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows -  
EXAMPLE from sheet TQ 0579  
1. Take the two letters preceding the sheet number ..... TQ 058  
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin ..... 058  
3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin ..... 291  
The resulting four figure number is the Northing.  
4. The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing.  
The resulting six figure reference is TQ 058291.
