

Made and published by the Director General of the Ordnance Survey, Southampton.

Scale 1:2500

Levelled.....1957  
Boundaries.....Dec 1974

HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road, track or path is evidence of the existence of a right of way.  
The alignment of tunnels where shown is approximate.

Abbreviations

|                                  |                                       |                                   |

Co. Const. Bdy

Co. Const. Bdy

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Boro Const & E.D. Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

New boundary symbols adopted for England and Wales 1974.

Boundary markings

Face of Fence

Face of Wall

Face of Hedge

Side of River, etc.

Top of Bank

Track of Hedge

Track of Stream

Undefined

Imperial equivalents for metric boundary markings

0.914m = 3ft

1.37m = 4 ft 6 in

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: 4267..... parcel number

4267..... area in hectares

4267..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area.....

Limit of area within which individual parcels are not shown.....

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

1. Take the two letters preceding the sheet number.....TQ

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....058

3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....291

4. The resulting four figure number is the National Grid Reference.....TQ 058291

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
