

PLAN SU 3461-3561

1:2500 scale

1:1250 scale (photographically reduced)

(a) Surveyed.

(b) Reconstructed from former County Series plans and revised.

(c) Revised.

Levelled.....1968,69

Boundaries.....Dec 1971

Survey of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.

Bench mark lists which may contain later levelling information, also particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

AREAS

Area measurement is to plan edge only. Enclosures or features joined for measurement of area.

EXAMPLE: 4367..... parcel number

1:800ha..... area in hectares

4:47..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area.

Limit of area within which individual parcels are not shown.....

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the national grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: G in Grange Farm

EASTING	342	NORTHING	611
Take west edge of 100 metres square in which point lies and read the figures opposite this line on the east or west margin.		Take south edge of 100 metres square in which point lies and read the figures opposite this line on the east or west margin.	
Estimate tens of metres from grid line to the point	0	Estimate tens of metres from grid line to the point	2
